

## **PROCEPT BioRobotics' Aquablation Therapy Spotlights at 2025 AUA Annual Meeting Along with Expert-Led Workshops**

April 24, 2025

*Presentations underscore long-term clinical outcomes, safety and durability in BPH treatment*

*Attendees invited to experience hands-on HYDROS Robotic System demonstrations*

SAN JOSE, Calif., April 24, 2025 (GLOBE NEWSWIRE) -- [PROCEPT BioRobotics](#)® Corporation (Nasdaq: PRCT) ("PROCEPT"), a surgical robotics company whose mission is to revolutionize BPH treatment globally, today announced an extensive lineup of scientific presentations and interactive workshops at the 2025 American Urological Association (AUA) Annual Meeting, taking place April 26–29 in Las Vegas, Nevada.

Clinical data presentations will highlight long-term outcomes, safety and durability of Aquablation® therapy for BPH. The breadth of presentations underscore PROCEPT's industry leadership and dedication to clinical innovation.

At PROCEPT's booth #1431, activities include:

- Surgeon-led presentations featuring Aquablation therapy with the next-generation HYDROS™ Robotic System
- Small-group hands-on workshop sessions where urologists can:
  - Explore the system firsthand
  - Hear peer perspectives on clinical, operational and economic experiences with Aquablation therapy
- Dedicated resident-focused session led by recognized clinical experts

"Aquablation therapy is not just advancing the field — it's redefining what's possible in BPH surgery," said Reza Zadno, CEO of PROCEPT BioRobotics. "Backed by long-term data, Aquablation therapy remains the only treatment that delivers durable symptom relief with low risk of sexual function or continence side effects. The breadth of clinical presentations at AUA this year reflects both the momentum behind Aquablation therapy and our unwavering commitment to advancing urologic care."

### **Thought Leader Presentations | Live at Booth #1431**

#### **Saturday, April 26**

##### **11:45 AM PST**

- How Aquablation Therapy Continues to Transform My BPH Practice  
Dr. Lewis Kritekman, Georgia Urology

##### **12:15 PM PST**

- Data-Driven Decisions: The Evidence Behind Aquablation Therapy  
Dr. Kevin Zorn, BPH Canada

#### **Sunday, April 27**

##### **11:45 AM PST**

- Building a High-Impact BPH Service Line: The Role of Aquablation in Modern Urology  
Dr. Ravi Munver, Hackensack Meridian Health

##### **12:15 PM PST**

- Optimizing the BPH Care Pathway: Where Aquablation Therapy Fits in Our Care Algorithm  
Dr. Shawn Marhamati, Potomac Urology

#### **Monday, April 28**

##### **11:45 AM PST**

- Earlier Intervention for BPH? How Aquablation Therapy Outcomes Reshaped My Thinking  
Dr. Christopher Kelly, NYU Langone

## Podium and Poster Presentations

Aquablation therapy for BPH is featured throughout the AUA Scientific Program, including:

### Saturday, April 26

#### 9:30-11:30 AM PST

- BPH/Male Voiding Dysfunction, Infection, Misc. Imaging  
Venetian G
- IP03: Benign Prostatic Hyperplasia: Surgical Therapy & New Technology  
Casanova 501

#### 1:00 – 3:00 PM PST

- PD08: Benign Prostatic Hyperplasia: Surgical Therapy & New Technology II  
Galileo 901

### Monday, April 28

#### 9:30 – 11:30 AM PST

- IP19: Benign Prostatic Hyperplasia: Surgical Therapy & New Technology III  
Marco Polo 701

#### 1:00- 3:00 PM PST

- Clinical Trials in Progress: Prostate and Kidney Cancer: WATER IV Prostate Cancer: A Randomized Phase III Study of Aquablation Versus Radical Prostatectomy for the Treatment of Localized Prostate Cancer  
Dr. Inderbir Gill, University of Southern California  
Hall C, The Square, Learning Lab

## PROCEPT BioRobotics Sponsored Activities:

### Friday, April 25

8:00 AM – 6:30 PM PST

AUA Innovation Nexus Conference Friday  
Venetian Convention & Expo Center

### Saturday, April 26

8:00 AM – 12 PM PST

Indian American Urological Association (IAUA)  
Lido 3101B

### Monday, April 28

7:30 AM to 12:00 PM PST

Urological Society for American Veterans (USAV)  
Palazzo A

## About Aquablation Therapy

Aquablation therapy is the first and only ultrasound guided, robotic-assisted, heat-free waterjet for the treatment of BPH. The system's real-time ultrasound imaging provides the surgeon with a multi-dimensional view of the prostate enabling personalized treatment planning tailored to each patient's unique anatomy. The surgeon can specify which areas of the prostate to remove while preserving the anatomy that controls erectile function, ejaculatory function and continence. Once the treatment plan is mapped by the surgeon, the predictable robotic-assisted execution enables prostate tissue to be removed in a precise, targeted and controlled fashion.

## About PROCEPT BioRobotics

PROCEPT BioRobotics is a surgical robotics company focused on advancing patient care by developing transformative solutions in urology. PROCEPT BioRobotics manufactures the AQUABEAM and HYDROS Robotic Systems. The HYDROS Robotic System is the only AI-powered, robotic technology that delivers Aquablation therapy. PROCEPT BioRobotics designed Aquablation therapy to deliver effective, safe, and durable outcomes for males suffering from lower urinary tract symptoms or LUTS, due to BPH that are independent of prostate size and shape or surgeon experience. BPH is the most common prostate disease and impacts approximately 40 million men in the United States. PROCEPT has developed a significant and growing body of clinical evidence with over 150 peer-reviewed publications, supporting the benefits and clinical advantages of Aquablation therapy.

## Forward-Looking Statements

This release contains forward-looking statements within the meaning of federal securities laws, including with respect to the Company's projected financial performance for full year 2024, statements regarding the potential utilities, values, benefits and advantages of Aquablation<sup>®</sup> therapy

performed using PROCEPT BioRobotics' products, including AquaBeam<sup>®</sup> Robotic System, which involve risks and uncertainties that could cause the actual results to differ materially from the anticipated results and expectations expressed in these forward-looking statements. You are cautioned not to place undue reliance on these forward-looking statements. Forward-looking statements are only predictions based on our current expectations, estimates, and assumptions, valid only as of the date they are made, and subject to risks and uncertainties, some of which we are not currently aware. Forward-looking statements may include statements regarding financial guidance, market opportunity and penetration, the Company's possible or assumed future results of operations, including descriptions of the Company's revenues, gross margin, profitability, operating expenses, installed base growth, commercial momentum, reimbursement coverage, overall business strategy, or information regarding the impact of other global events on the Company and its operations. Forward-looking statements should not be read as a guarantee of future performance or results and may not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. These forward-looking statements are based on the Company's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties. These risks and uncertainties are described more fully in the section titled "Risk Factors" in the Company's filings with the Securities and Exchange Commission (the "SEC"), including the Company's annual report on Form 10-K expected to be filed with the SEC on or about February 28, 2024. PROCEPT BioRobotics does not undertake any obligation to update forward-looking statements and expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein. These forward-looking statements should not be relied upon as representing PROCEPT BioRobotics' views as of any date subsequent to the date of this press release.

**Important Safety Information**

All surgical treatments have inherent and associated side effects. For a list of potential side effects visit <https://aquablation.com/safety-information/>
