PROCEPT BioRobotics®

CARBON REDUCTION PLAN

Carbon Reduction Plan

Supplier name: PROCEPT BioRobotics UK, Ltd.

Publication date: November 5, 2026

Commitment to achieving Net Zero

PROCEPT BioRobotics UK, Ltd. (hereinafter "PROCEPT BioRobotics") is committed to achieving Net Zero emissions by 2040.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases ("GHG") that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025

Disclaimers: PROCEPT BioRobotics previously reported in 2023 that it intended to establish its baseline GHG emissions from its UK operations. No emissions data was published prior to this in the UK. Accordingly, our prior calendar year reporting period (Reporting Year: 2025) will be used as our baseline emissions footprint as a reference point against which emissions reductions can be measured in subsequent reporting years.

Scope 1 emissions - PROCEPT BioRobotics does not own or control any vehicles or sites in the UK where direct GHG emissions occur.

Scope 2 emissions - PROCEPT BioRobotics does not own or control any sites in the UK where indirect GHG emissions occur. We do not have an office, or a similar type of site, in the UK where energy is supplied from the grid that we purchase, including without limitation electricity, steam, heat, or cooling. PROCEPT BioRobotics utilizes a work-from-home model for all of our UK employees.

Scope 3 emissions include all sources not within an organisation's Scope 1 and Scope 2 boundaries. The following categories may be reportable as our Scope 3 emissions:

- Category 4: Upstream transportation and distribution;
- Category 6: Business travel;
- Category 9: Downstream transportation and distribution.

The table below captures our baseline of Scope 3 GHG emissions.

Emissions	**Total (tCO_2e)**

Scope 1	0
Scope 2	0
Scope 3	1235
Total Emissions	**1235**

Current Emissions Reporting:

Reporting Year: 2025	
Emissions	**Total (tCO_2e)**
Scope 1	0
Scope 2	0
Scope 3	Please refer to further information above under "Disclaimers" for Baseline Year: 2025.
Total Emissions	*

Emissions Reduction Targets

We note that we expect as we grow and scale our operations in the UK in future years, our gross emissions would consequently grow too. In order to continue our progress towards Net Zero emissions, we are reviewing the following carbon reduction targets for future adoption, subject to adjustments based on actual future emissions.

Long Term Target:

Reduce absolute Scope 1 and Scope 2 as well as reduce Scope 3 GHG emissions from upstream transportation and distribution (category 4), , business travel (category 6), and downstream transportation and distribution (category 9) from the baseline year in support of the Net Zero emissions goal.

Majority of our Scope 3 emissions are related to our employees travelling to customer sites to sell product as well as transportation of finished product from our distribution center in the UK to customers.

Planned Carbon Reduction Initiatives

Future Carbon Reduction Initiatives:

PROCEPT BioRobotics is committed to implementing further measures to reduce greenhouse-gas emissions associated with its UK operations relative to the established baseline. Planned initiatives include adopting lower-carbon logistics, warehousing and transportation solutions and working collaboratively with suppliers, business partners and customers to promote environmental responsibility across the value chain.

Environmental performance and carbon-reduction capability will be considered, where relevant and proportionate, when evaluating and selecting suppliers, logistics providers and

other business partners. This will include assessing their ability to support PROCEPT BioRobotics in achieving its stated emissions-reduction targets.

Scope 1 and Scope 2 emissions

Should PROCEPT BioRobotics own or exercise operational control over UK premises or assets in the future, it will seek to reduce associated Scope 1 and Scope 2 emissions through measures, which may include:

- Improving the efficiency of electricity and heating use within offices and other facilities.
- Procuring renewable electricity where commercially and operationally feasible.
- Incorporating energy efficiency and carbon performance into the assessment of future property leases, fit-outs and facility upgrades.
- Monitoring energy consumption to identify and prioritise further reduction opportunities.

Scope 3 emissions

PROCEPT BioRobotics will seek to reduce Scope 3 emissions by:

- Using virtual-meeting technology when possible to avoid unnecessary business travel.
- Encouraging employees to use public transport for business travel and commuting where practical.
- Promoting lower-emission transport options where practical.
- Working with suppliers and logistics providers to identify if there are opportunities to reduce emissions from transportation, distribution and warehousing.

Progress against these initiatives and the associated emissions-reduction targets will be reviewed periodically. PROCEPT BioRobotics will use the results of these reviews to identify further opportunities, refine its approach and support continuous improvement in its carbon-reduction performance.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or the equivalent management body).

Signed on behalf of the Supplier:

/s/ Kevin Waters
